GENERAL INFORMATION

EMS Find App is B2B & B2C on-demand mobile platform, designed to connect the health care providers and patients to the near by network of medical transport companies throughout the United States and Canada for benefit of the patients.

The platform enables users and public to schedule medical transportation in timely and efficient way based on the type of medical transportation which best fits each patient needs.

App works on any smart device including smartphones and tablets. IOS and Android versions will allow users to connect in real time to local and near by pre-screened medical transportation companies wherever the medical transports are needed and fit the medical, logistical and financial criteria.

IOS VERSION GUIDE

1. GETTING STARTED

SYSTEM REQUIREMENTS

Compatibility: Requires iOS 8.0 or later.

Compatible with iPhone 4,5,6, iPad and iPod Touch.

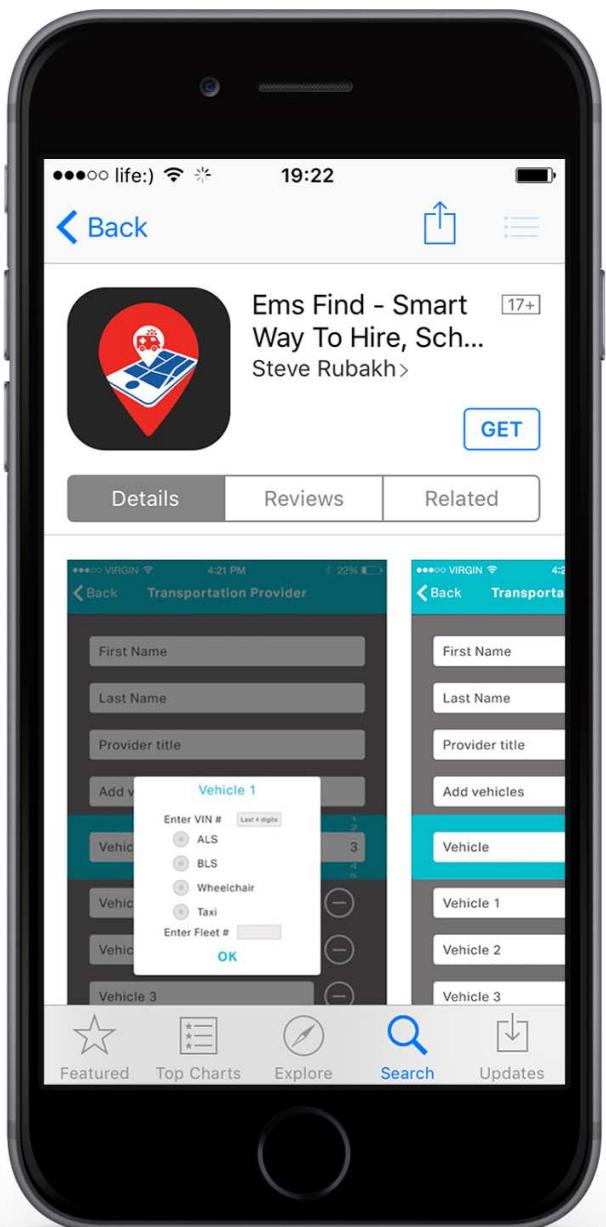

The Internet access is required to install and use "EMS Find" application.

GPS navigation requires device GPS to be turned ON.

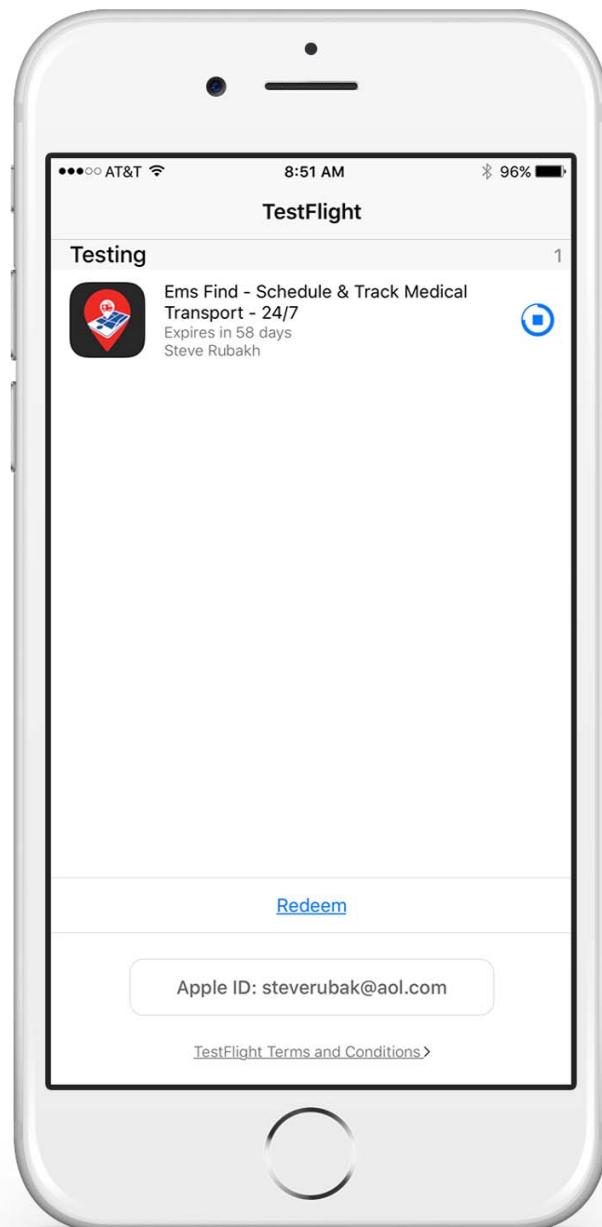

INSTALLING EMS FIND APP

EMS Find application can be installed from App Store (Pic.1):

1. Open App Store.
2. Use the Search tab to find the EMS Find application. Enter "EMS Find" into the search field.
3. Select the application name from the list of results.
4. Tap the Get button to download the application.
5. The button will change to a green *INSTALL* button. Tap the button to install the application.
6. You will be return to your Springboard where you will see a dimmed icon with an install status bar overlaid.

Pic. 1

Pic. 2

In addition, EMS Find application can be installed directly from iTunes. Once installation has finished successfully the icon will become active (Pic.2).

2. HOW TO USE

USER TYPES

Tap the EMS Find icon to launch the application and select the type of user account (Pic. 3).

Transportation Provider:

- Ambulance (ALS/BLS/Paratransit/Wheelchair) Companies
- Taxi Operators
- Dispatchers

Healthcare Provider:

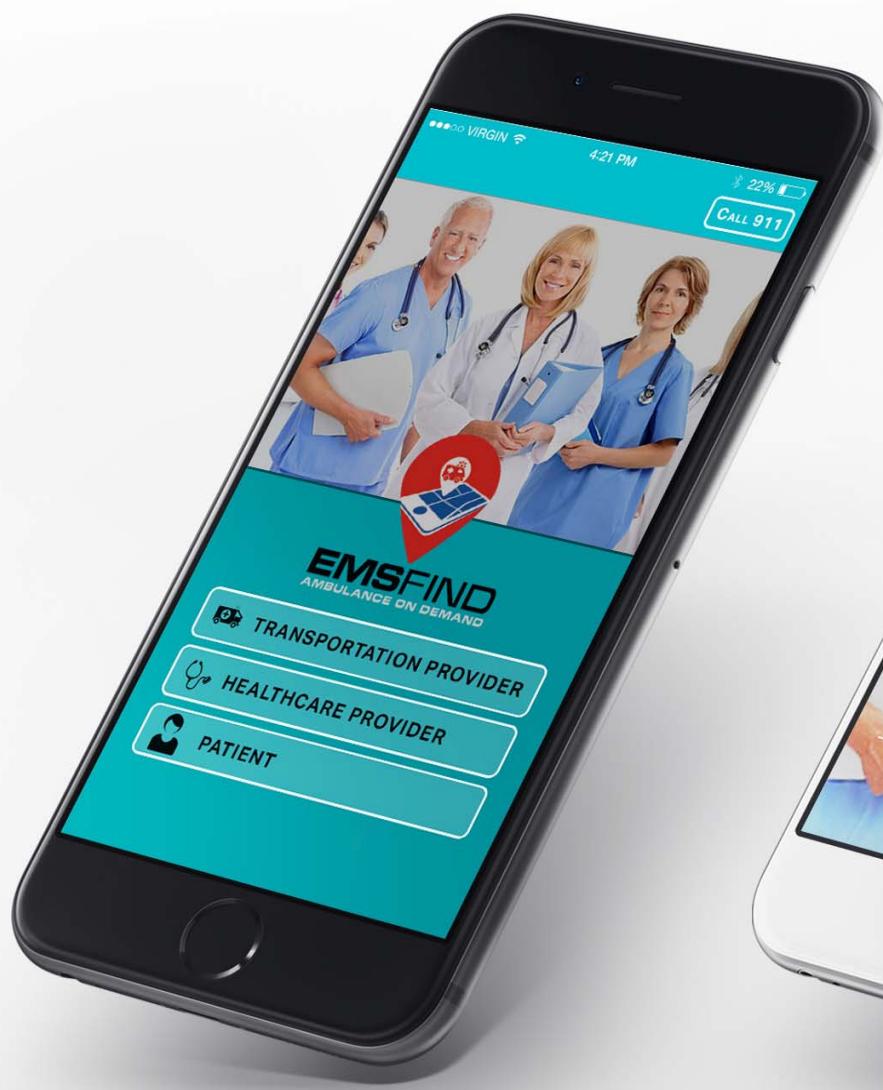

- Nurses
- Social Workers
- Case Managers
- Home Care Nurses
- Discharge Planners
- Nursing Home Operators

Patient:

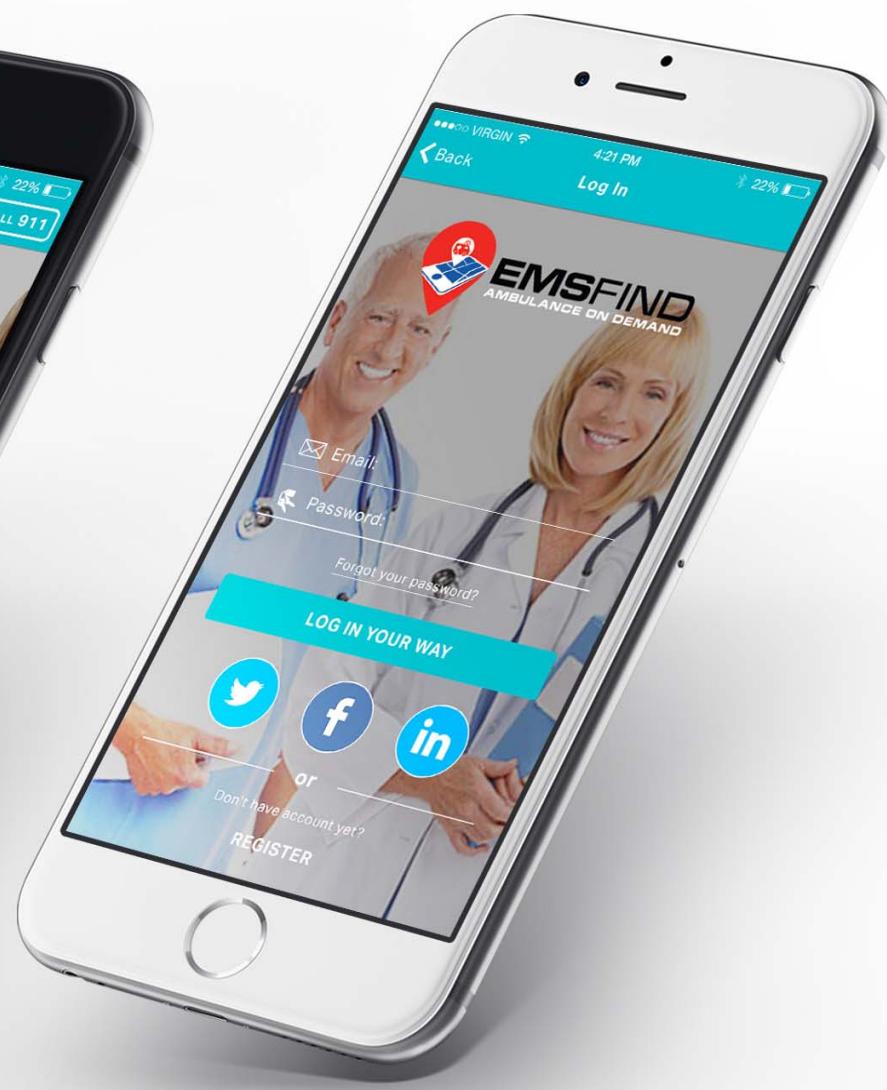

- General Public and Family Members

REGISTRATION AND LOG IN

After selecting user type, you can register and log in with email or using social network accounts (Pic. 4).

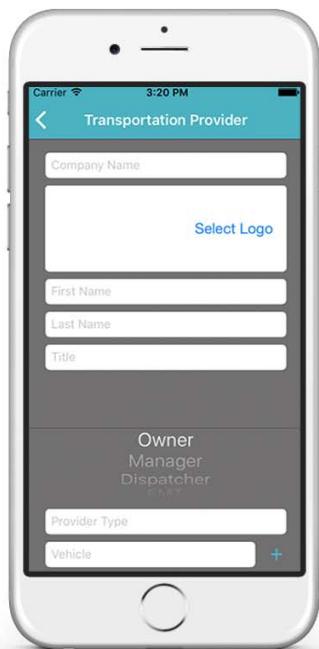

Pic. 3

Pic. 4

REGISTRATION:

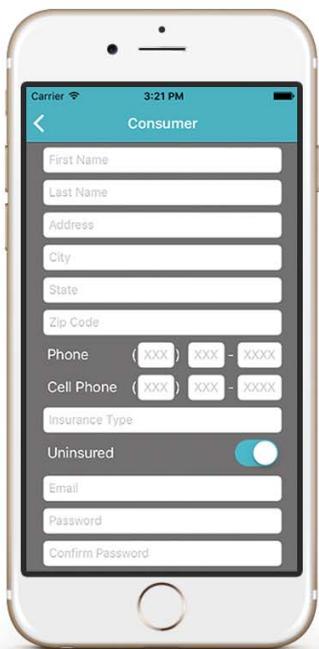

1. Tap the "Register" button or use social network account (Facebook, Twitter, Linkedin).
2. Fill out registration form which includes your personal data, address, provider or facility type, title and other. Select your insurance type from supported insurance types in your State. Press "Register" button (Pic. 5, Pic. 6, Pic. 7).

Pic. 5

Pic. 6

Pic. 7

3. As Transportation Provider you can choose logo picture and subscription plan. Also, you will be required to enter credit card data, select all accepted insurance plans, add Dispatchers and add all vehicles. Select vehicle type (ALS, BLS, Wheelchair, Paratransit, Taxi) by entering the last 4 digits of the VIN and Fleet #. To be active and visible on map, user is required to select driver from list of authorized drivers. The driver be assigned to the activated vehicle. For Wheelchair and Taxi operators, only 1 driver is required to log in. However, 2 drivers/workers must be signed in and activated for ALS/BLS. Thus, the second user must sign in, choose same vehicle and second driver to be activated. At maximum, 1 driver/worker must be signed in and activated for Wheelchair/Paratransit/Taxi.

Also you can log in like Dispatcher, who can operate transport requests (Pic. 8).

To reset your password, use "Forgot your password" link:

- Click on the "Forgot your password" link.
- Enter your email address and tap "Reset Password" button (Pic.9).

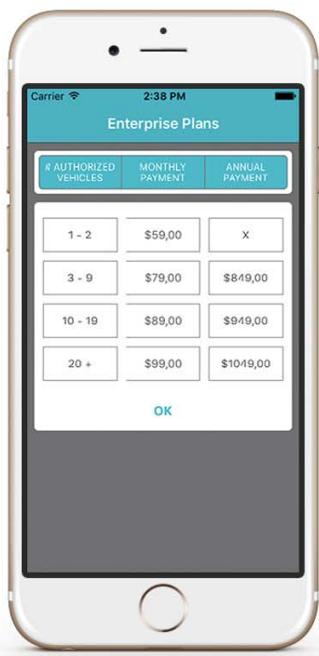

You will receive an email containing an encrypted link. Click on the encrypted link to advance on the Reset password page.

Pic. 8

Pic. 9

Pic. 10

EMS FIND SUBSCRIPTION PLANS (Pic. 10)

Transportation Provider could choose subscription plan after filling out registration form and taping "Register" button.

1. EMS Find Standard (B2C current version):
 - Free subscription plan

- User is required to pay fee of \$5.00 per each accepted transport request. Notification is sent out to confirm the payment. At the time of sending out the confirmation, system will alert Healthcare Provider to fill out the PCS form.

For selecting EMS Find Standard subscription plan tap "Skip" button at "Enterprise Plans" page.

2. EMS Find Enterprise (B2B version):

- **1-2 vehicles**
 - monthly payment 59.00\$;
- **3-9 vehicles**
 - monthly payment 79.00\$;
 - annual payment 849.00\$;
- **10-19 vehicles**
 - monthly payment 89.00\$;
 - annual payment 949.00\$;
- **20+ vehicles**
 - monthly payment 99.00\$;
 - annual payment 1049.00\$.

EMS Find Enterprise subscription offers to turn key solution to assist Healthcare Facilities and Ambulance Providers to effectively manage their non-emergent medical transports. Ambulance Company pays monthly or annual fee. Once fee is paid, Ambulance Company sends invite to activate unlimited number of users from the same Healthcare Facility.

Select your EMS Find Enterprise Subscription Plan by considering the number of vehicles in your fleet. User is required to make payment at time of sign up for "Enterprise Plan".

To connect your Enterprise plan with Healthcare facility, user must go to Select "My Providers" in "Settings" menu and select a specific Healthcare Provider by searching for the facility name or user's last name. Unlimited number of Healthcare Providers from same facility can be assigned. Once Transportation Provider selects Healthcare Provider, user can send out the invite to connect.

If Transportation Provider became the partner of Healthcare Provider, color of his pin becomes dark for Healthcare Provider.

Description of difference in color of red pins:

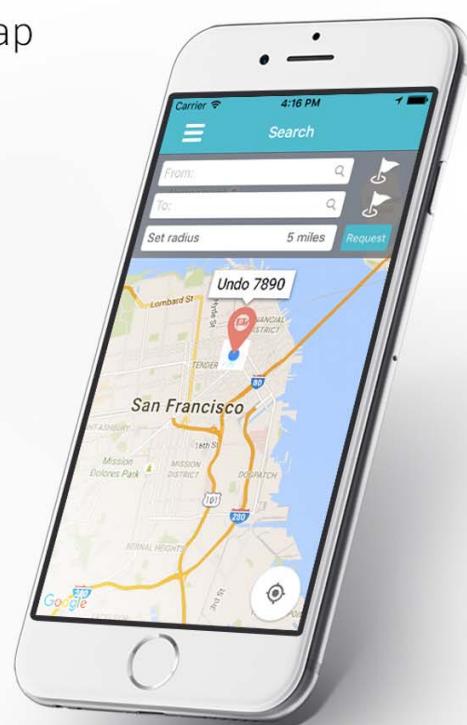

- Dark Red Pin - partner (Healthcare Provider and transportation provider have specific business relationship, initiated by paying Enterprise Plan fee).
- Light Red Pin - non partner, indication random Transportation Provider on the map.

3. SEARCH

After registration and logging in you will be connected to the Map Screen, where you can find the closest transportation providers.

Healthcare Provider, Patient or Dispatcher, user will be able to select unlimited number of qualified vehicles based on specific information such as insurance plan, type of services, time of pick-up, etc (Pic.11).

1. Select address "From".
2. Select address "To".
3. Choose Searching Radius.
4. Choose Provider Type.
5. Enter Patient's Insurance Plan.
6. Select Nearest Transportation Provider. System will allow Requestor to contact multiple Transportation Providers at same time, thus insuring the fastest response, thus making scheduling process simple, reliable and efficient.
7. Tap "Request" button to send request information to all pre-screened transportation providers.

Pic. 11

You could see on the Map screen 4 types of users:

- (red pin screenshot) - Transportation Provider;
- (blue pin screenshot) - Healthcare Provider;
- (grey pin screenshot) - Patient;
- (red pin with black ambulance logo inside screenshot) - Partner Transportation Providers.

4. REQUEST FOR MEDICAL TRANSPORTATION

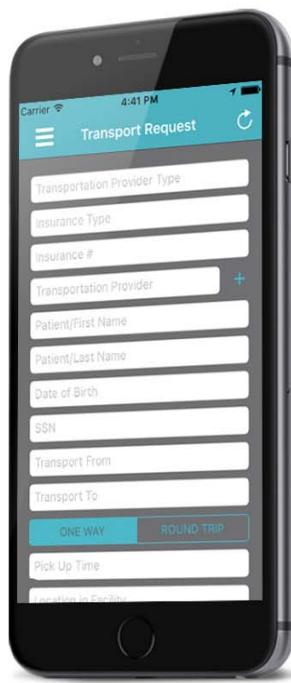

For creating transport requests choose "Transport Request" in main menu (Pic.12).

- Select transportation provider type (Pic. 13).
- Fill out request for transport form which includes your basic medical history, pick up location, desired time and destination, insurance information to determine payment option for services. Other payment options include cash and credit card.
- Tap "Next" button and choose medical equipment that you need (Pic. 14).
- Submit your transport request.

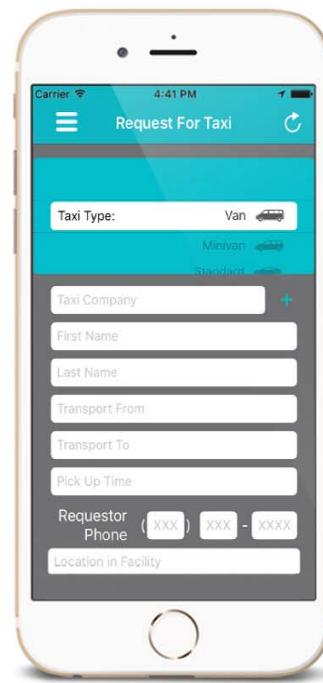

Within few minutes, you will be contacted by transportation provider to schedule transport and confirm all details.

Once transport request is accepted by transportation provider, you will receive alert notification and will be able to track the trip route (Pic. 15).

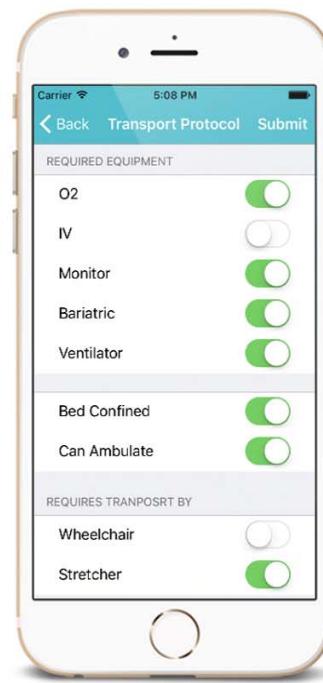

During the creation of request it is possible to find an existing patient or enter the name manually that allow the patient to track the request (Pic. 16).

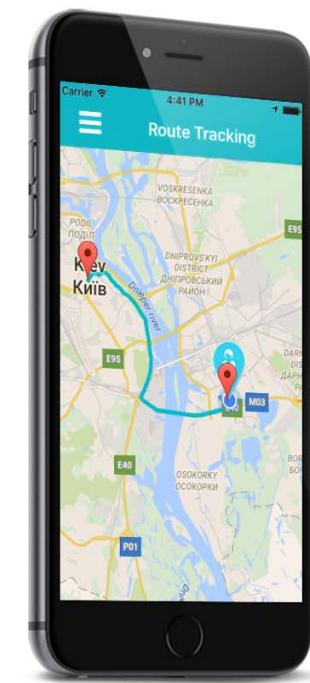

Pic.12

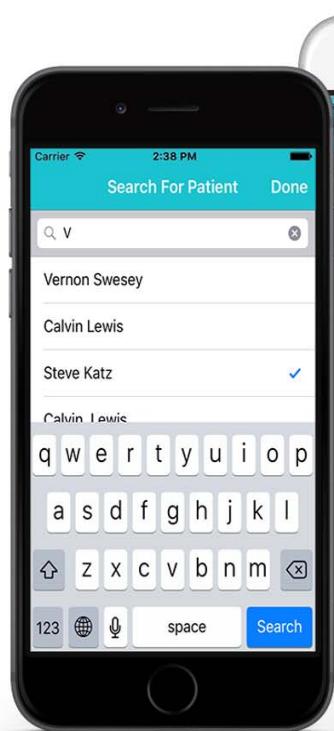

Pic. 13

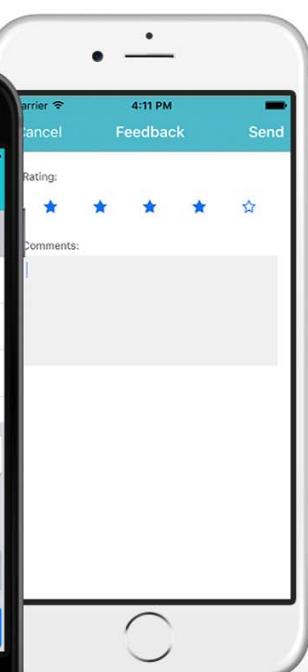

Pic. 14

Pic. 15

Pic. 16

Pic. 17

Optionally you can leave feedback about transportation provider after request for transport is completed:

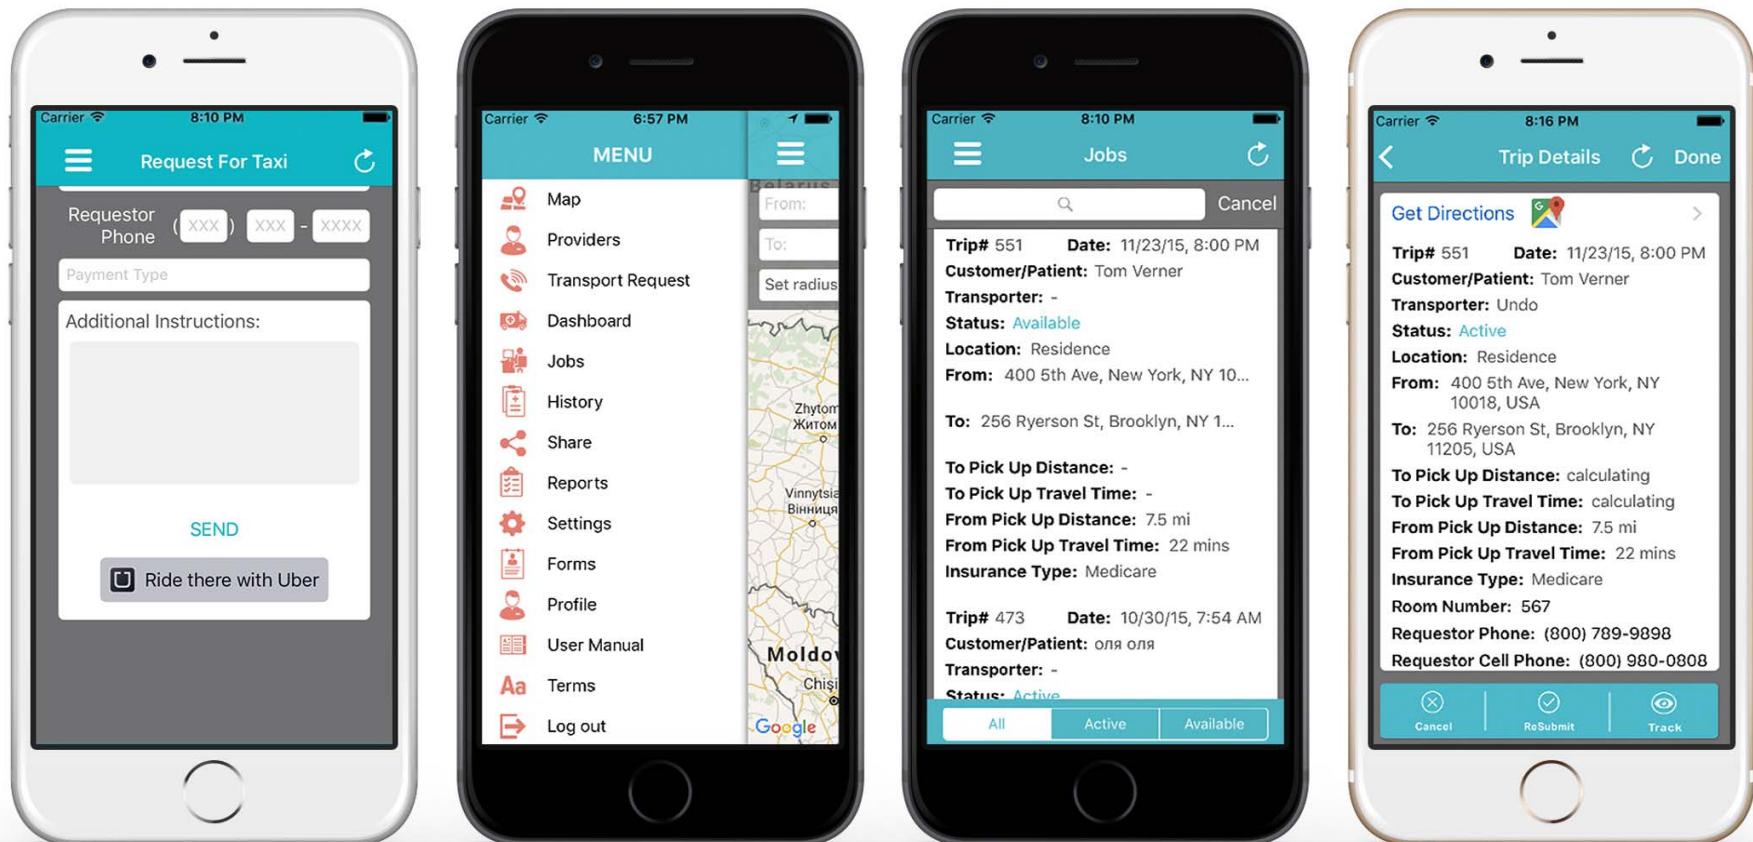

- open "History" in main menu;
- select "Completed" request for transport;
- tap "Feedback" button;
- choose "Rating" and leave your comments;
- tap "Send" button (Pic. 17).

The App stores your last request information and you can use "Refresh" button to pre-populate your previous request information in the transport request form and resubmit your transport request.

As *Transportation Provider* you will receive real time alert and notifications regarding available requests for medical transports from local healthcare providers and patients, and see all trip details in "Jobs" menu. Simple click on record to see all information regarding specific trip.

If you want to book a taxi, you can also do this using Uber in Request For Taxi with button "Ride there with Uber" (Pic. 18).

Pic. 18

Pic. 19

Pic. 20

Pic. 21

5. USER MENU (Pic. 19)

JOBs

Jobs menu provides you a view of all available and active transport requests and trip details (Pic.20).

You could select requests by using status filters ("All", "Active", "Available") or use a "Search" field.

In addition, you could use "Dashboard" menu for viewing and selecting all your transport requests.

Transportation Provider could accept or cancel incoming requests for transport in Jobs menu:

- Select available request for transport.
- Open Trip Details in Jobs menu and tap "Accept" button.
- Transportation Provider that have "Standard" subscription plan would be assigned to this request as accepted transportation provider and get notifications to confirm the payment (fee of \$5.00 per each accepted transport request).
- Accepted transport request changes status to "active" and customer will receive alert notification.

Transportation Provider can view full trip details (pick up location, desired time and destination, insurance plan or other payment method, patient or requestor name, phone number, transport protocol and necessary medical equipment) and will be able to track the trip route after accepting request for transport.

In addition, transportation provider can get the directions using Google Maps (Pic. 21).

Select the accepted transport request in "Jobs" menu, open "Trip Details" and tap "Done" button to complete transport request.

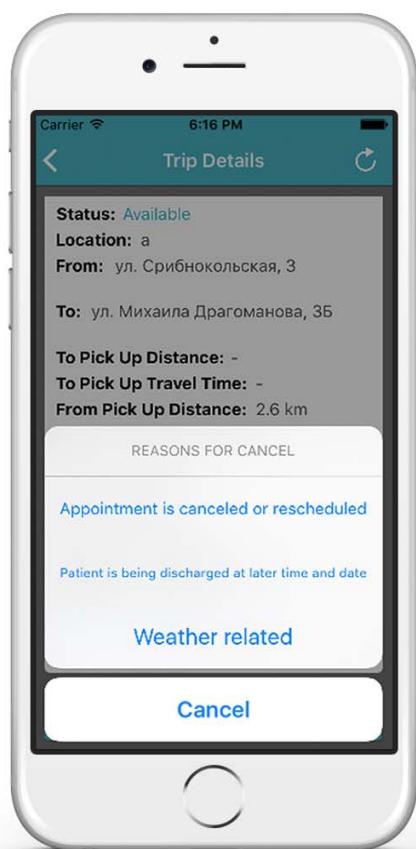

For canceling transport requests:

- Select the transport request that you want to cancel in Jobs menu.
- Open “Trip Details” and tap “Cancel” button (Pic. 22).

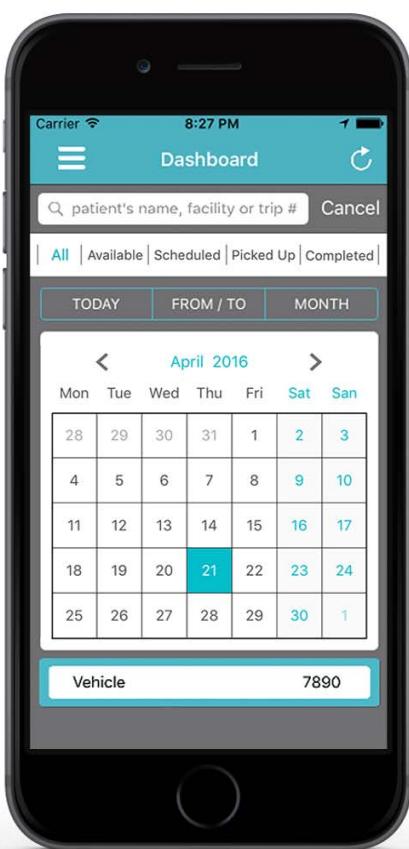

To forward transport request:

- Select the transport request that you want to forward in Jobs menu.
- Open “Trip Details” and tap “Re-Submit” button.
- Select a new executor (transportation provider) and tap “Submit” button.

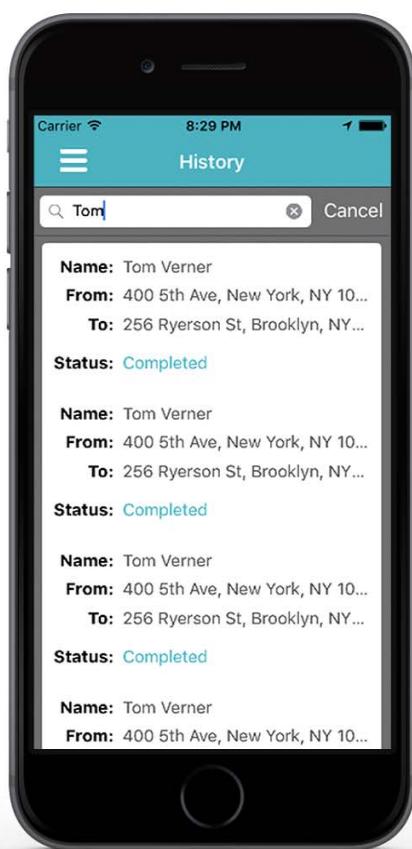

Transportation Providers that have “Standard” subscription plan would get refund of \$5.00 per each forwarded or canceled transport request that they have paid.

Pic. 22

Pic. 23

Pic. 24

Pic. 25

DASHBOARD (Pic.23)

Dashboard menu contains all transport requests in a calendar view.

You could see information about all your vehicles. Select a vehicle from the list below on the screen.

There are two categories of filters.

First category filters by status: allows to view “all”, “active”, “available” or “completed” requests.

Second category filters by time intervals: allows to view “today”, “from/to” or “month” requests.

Also, you could use “Search” field to find requests by patient’s name, facility or trip.

HISTORY (Pic.24)

History menu contains all information about your completed or canceled transport requests.

You could navigate by “Search” field to find a request by the address, date or number of request.

SHARE (Pic. 25)

You could share EMS Find App via social networks Facebook, Twitter, Linkedin and via SMS or Email.

MY APPS (Pic. 26)

- Providers (Pic.27)

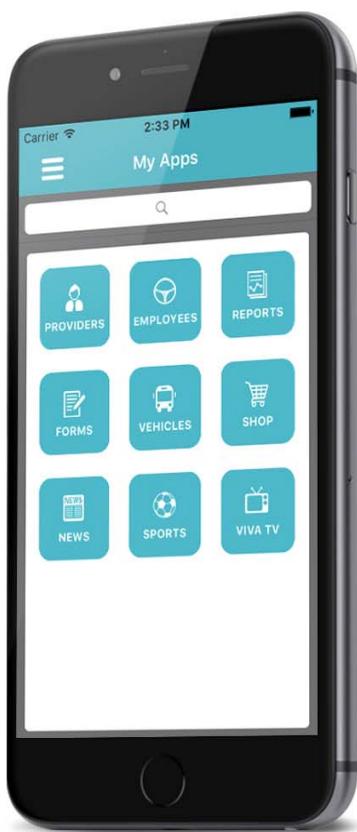

Providers section contains information about all transportation providers in chosen radius with possibility to change the radius.

You could use "Search" field to find providers by the name.

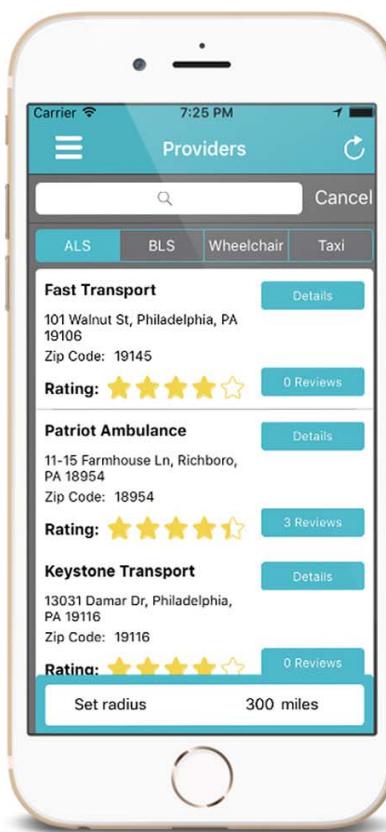

Also, you could use filters by type of providers : "All", "ALS", "BLS", "Wheelchair", "Taxi". Providers menu allows to watch details, rating and reviews of each medical transportation provider (Pic. 28).

- Employees (Pic. 29)

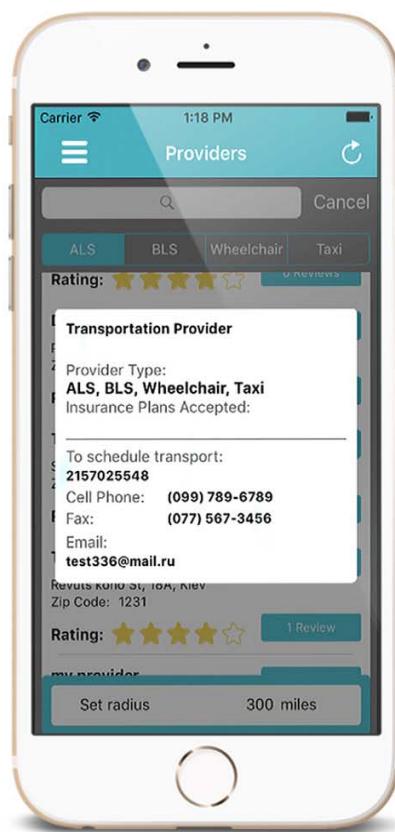

Employees section contains list of all workers with detailed descriptions.

Pic. 26

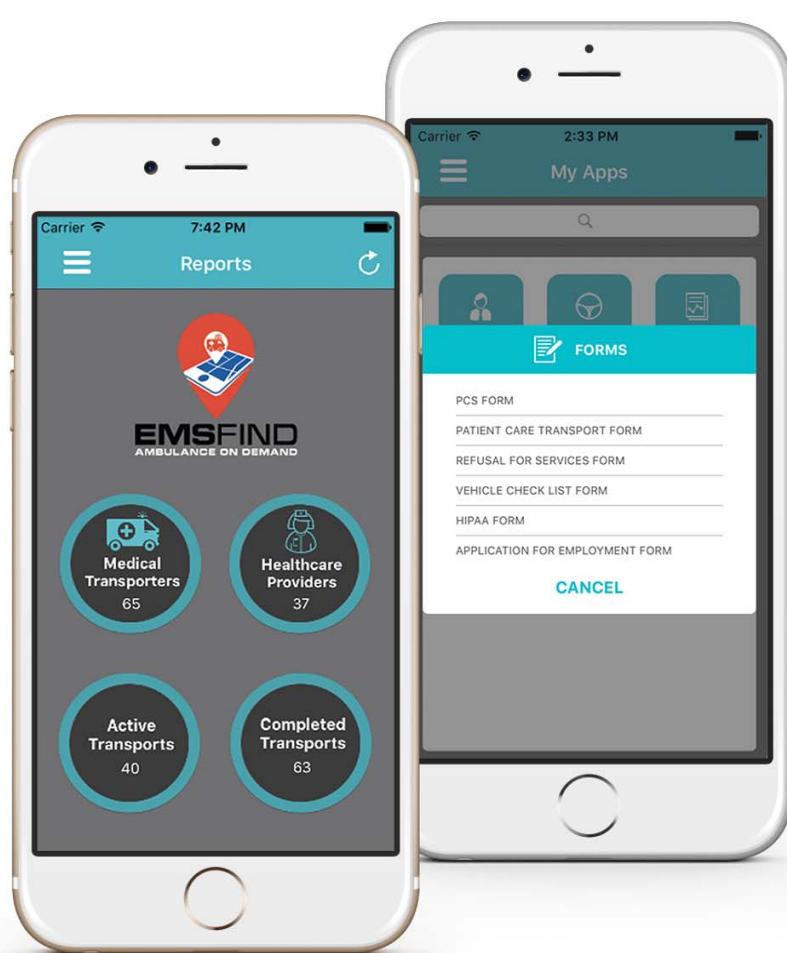

Pic. 27
